mcjquinzon@gmail.com | +639458213693 | <https://ariesanon.github.io/MCJQuinzon/>  
#006, Santiago, Bauang, La Union

---

## SKILLS

Languages and Technologies: Python, C, Java, C#, MySQL, HTML, CSS  
Tools: Visual Studio, Visual Studio Code, XAMPP, NetBeans

---

## PROJECTS

PNP CrimeLab – Lead Developer and Designer, and Quality Assurance Tester

- Led the development of the website that allowed police officers to create, view, update, and delete information regarding their cases, as well as be able to view 3D recreation of crime scenes and autopsies via browser.
- Designed using HTML, CSS, JavaScript, PHP, Babylon.js, and MySQL.

i-SENSE – Lead Developer and Quality Assurance Tester

- Co-created a device that detects the type and quality of meat using Python.
- Created the Convolutional Neural Network that detects the type of meat presented to the device using Keras and TensorFlow.

Wolfram Art Gallery – Solo Developer

- Developed an application that allows the user to add, edit, and browse artworks, as well as be able to perform CRUD operations on employee information.
- Developed using C# and MySQL.

Power Monitoring System – Solo Developer

- Created a power monitoring system that allows the user to manage rooms and appliances and determine the top five appliances that use the most power.
  - Developed using Python and Django.
-
